

OVERVIEW

Objective/Vision:

Purpose of the project is to display a numeric representation of time instead of needles. It is time saving and easy to read the time.

Some knowledge of UI design is needed here if a visually pleasing design is wanted. This requires some event handling as well as periodic execution functions to achieve the desired effect.

Tools to be used:

Use any IDE to develop the project. It may be Eclipse/Netbeans etc.

Technology used:

- 1) Front End: Java Swings
- 2) Back End: Core Java
